

# *The all encompassing broadcasting model designed to serve the world!*

- ❑ The future of broadcasting is cloud based broadcasting that mixes online video streaming, mobile applications, closed IP digital networks, niche social media, set top boxes and foreign broadcast (satellite) opportunities into a single platform.
- ❑ This multi-Genre broadcast model / platform referred to as “Over the Top Broadcasting” is the model which Transborder Network, Ltd., has developed to provide all content to include, business, educational, technology, entertainment and religious content.
- ❑ Our platform has the capability to bring together any Genre into one portal combining online video streaming, mobile applications, social media, closed IP digital networks and foreign broadcast models targeted towards emerging markets such as Africa, Asia, India and the Caribbean.
- ❑ This platform can be customized to fit any niche network / Genre. This translate to the fact that we are able to cost effectively deploy “Over the top” (OTT) partitions/networks and channels/stations very quickly for global broadcast.
